Tekna in a nutshell

Thanks to Tekna's timeless designs made from robust, high-quality materials, Tekna has been a pioneer in the lighting world since the early 1990s. The seamless finish of our lighting exudes pure quality. This approach is particularly appreciated both at home and abroad. With the Nautic, Arton, Astone and Flatspot collections, our brand occupies a particularly large segment of the market because we manufacture both architectural, atmospheric and designer lighting.

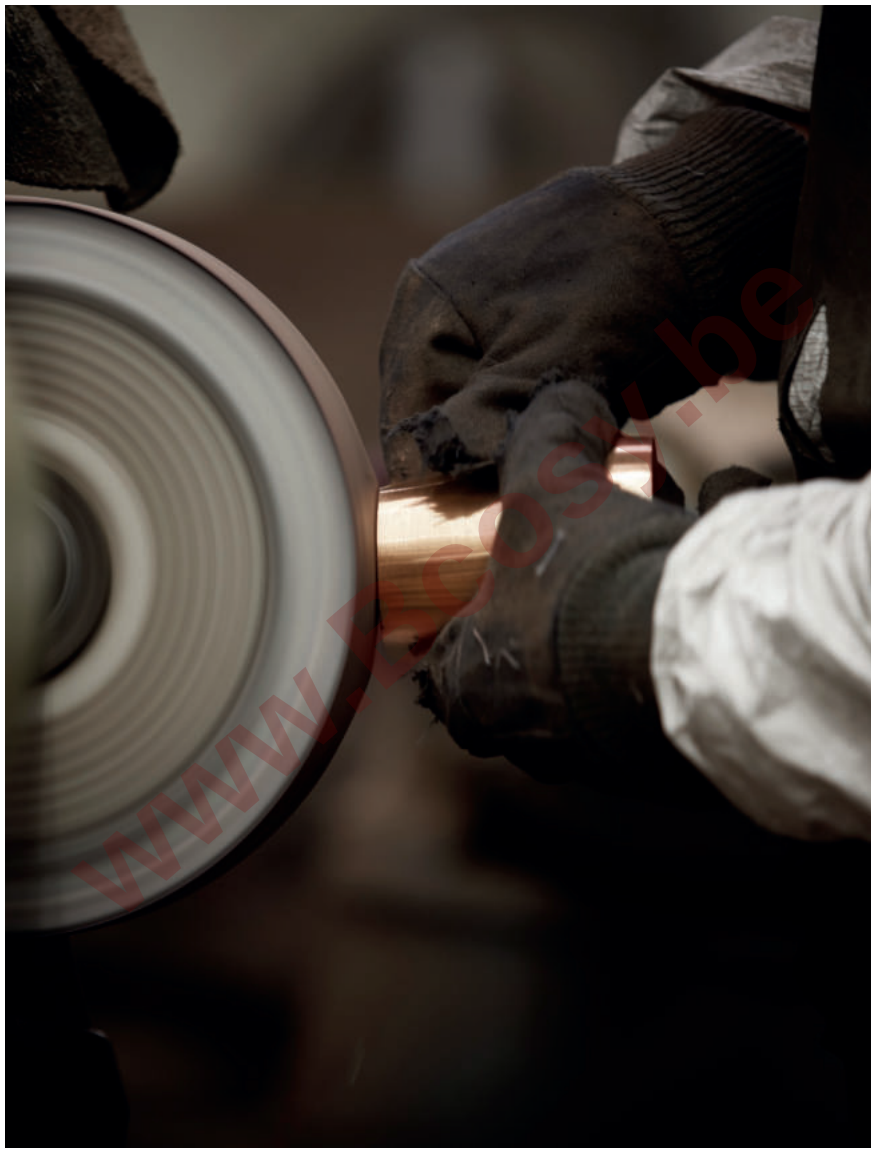
Handcrafted in Europe

Tekna has a great passion for traditional techniques with a personal touch. Therefore we are always looking for authentic ideas that can be produced by hand, in Belgium.
No luminaire is the same, that is the power of "handmade".



Our recipe for success? Pure materials, craftsmanship and solid, functional designs.

www.Bcosy.be - Waarschoot - België - Belgique - Belgium - Belgien tel 0032 (0) 9 378 24 30 Mail: info@bcosy.be

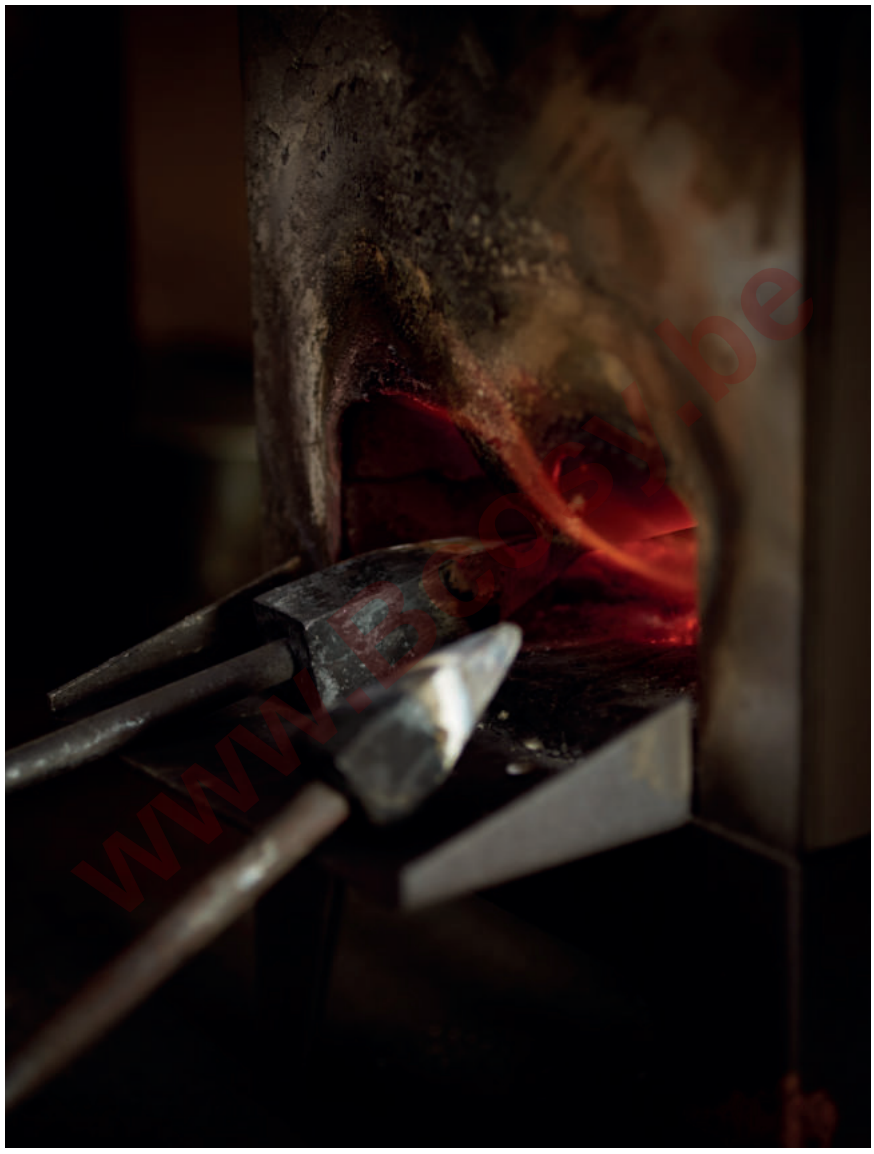
To create something exceptional,
your mindset must be relentlessly focused on the smallest detail.



Every design is created with natural materials. Almost 98% of our fixtures are made out of brass. Not only is it a high quality material, it's also a very rewarding and reliable material to work with. You can easily bend it into the desired shape and it can easily withstand all weather conditions. You can also find bronze, aluminum, red copper, marble and glass in our lighting, these noble materials are extremely rewarding and lend themselves perfectly to Tekna's wide range of collections. These robust materials make our brand what it is.

www.Bcosy.be - Waarschoot - België - Belgique - Belgium - Belgien tel 0032 (0) 9 378 24 30 Mail: info@bcosy.be

To develop our luminaires, we resolutely opt for one approach: we combine strong, traditional methods with a timeless character. A successful recipe that radiates simplicity, functionality and elegance.

Tekna was founded in the early 1990s, continued to innovate and became a real pioneer in the world of lighting.

In 2017 the Blijweert family became the head of Tekna. With a shared passion for the artisan, high quality lighting and an endless experience in the entrepreneurial world, completely ready to take Tekna to the next level.

A word form our CEO

We are convinced that Tekna can broaden its offer and achieve even more by maximizing its strengths. And this last point is extremely important to us, the high level of finishing, craftsmanship and noble materials must always remain the thread that links our products.

Behind every strong brand is a strong team. This team contributes enormously to Tekna's evolution. This evolution is not only characterized by innovative designs, materials and production techniques. There is a strong focus on the quality level of our products and services towards our customers. Everyone is committed to ensuring ever-increasing quality every day.

With a Tekna community spread all over the world, we want to give the world of lighting a new dimension.

- Maxim Blijweert, CEO

www.Bcosy.be

www.Bcosy.be - Waarschoot - België - Belgique - Belgium - Belgien tel 0032 (0) 9 378 24 30 Mail: info@bcosy.be

A picture is worth a thousand words, but a design is worth an entire book. A design tells a story of its history, its future, its inspiration and its designer. The feeling you get from holding a finished product that was previously only an idea in your head is truly magical. The weight, the texture, the crisp edges… all the little nuances and details come out to play. This is why I am such a believer in making a model of every design that is worth pursuing. That is how we separate the great from the amazing.

The design process is a wonderful mix between old and new. First comes the idea, this can come from anything really, but we do have a preference to the art deco style. After this comes one of the best parts… Drawing! I will draw for hours on end, trying different variations of the original idea. All the drawings still happen with pencil and paper. At this point I really avoid using a computer at all cost. Once everything is narrowed down to one sketch I'll turn this into a 3D drawing on the computer. From this I can make photorealistic renders. They allow me to see all the details from every angle in a wide array of materials. Next is the technical aspect where we look at the best methods to use artisanal manufacturing combined with the latest technologies. All this work results in something extraordinary.

"We don't make light fixtures here, we make works of art that just so happen to emit light."

- Kevin De Koning, Head of Design

NAUTIC®

www.Bcosy.be

Nautic is our iconic collection of authentic luminaires, made from raw materials. Tekna found its inspiration in the world of the marine. The maritime aspect, the charming character of old train sets and the craftsmanship in factories form the basic idea for Nautic's designs. An original combination where simplicity and functionality are key. The timeless design and choice of materials give the luminaires a harmonious appearance. They are atmospheric and stylish, without unnecessary adornment.

Throughout the years, Nautic has become a true concept in the lighting world. Thanks to the use of robust materials, the luminaires are suitable for all weather conditions and therefore resistant to sea salt, which is required for example for those who need lighting that is suitable for coastal areas. Nevertheless, thanks to the seamless finish, the collection has a very sophisticated look that exudes pure class. And despite the fact that Nautic's style was initially inspired by maritime art, we have also opted for other styles in recent years, which means we market a wider collection.

ARTON®

www.Bcosy.be

Arton allows us to focus on an audience that loves striking, unique and high-end design lighting. Sometimes a little eccentric, sometimes basic with a little flair. One thing is for sure, this lighting will grab your attention.

With these designs we surpass a lot of contemporary designs. Tekna makes the difference by combining a remarkable design with exceptionally high quality materials and our typical seamless finish.

The inspiration of this collection finds its origin in the Art Deco line with a todays touch. Rich colors, geometric figures and exuberant decorations are reduced to fine accents that make each design unique. We love to experience shapes, colors, glass structures and materials including bronze and brass. These combinations often lead to innovative designs.

We count on our in-house designer who knows better than anyone how to work exclusively and creatively without losing sight of Tekna's core values.

ASTONE®

www.Bcosy.be

The harmony of art, craftsmanship, advanced technology and lighting… This is what the Astone Collection strives for. In addition to the well-known materials including bronze, brass and glass, we are now adding a fourth sustainable material: natural stone. This noble material makes every product unique. No two are the same.

Each product starts as a solid block of stone. This is chiseled, ground and milled into a beautiful shape and is incomparable. Every block tells its own story, the veins, the colors, the textures… All orchestrated by the forces of nature millions of years ago. The result is a magnificent composition of stones and minerals that is admired by all.

In close cooperation with our in-house designer and one of the world's leading natural stone companies, we transform these treasures of raw materials into unique and high-quality design lighting. The Astone Collection allows us to be creative with colors, textures and shapes.

Light as timeless as a stone!

FLATSPOT®

www.Bcosy.be

Flatspot was created in 2009 as a result of the increasing demand for functional indoor lighting. Tekna recognised the challenge this posed and developed Flatspot, a lighting collection that consists of a wide range of spotlights with unique features. Ordinary spotlights only illuminate one specific zone. Flatspot has been developed in such a way that the light surface is much wider and can be specifically targeted, without causing shadows on the walls. As a result, we have developed an extensive collection of semi built-in and fully built-in downlights, and directionals.

The Flatspot collection contains luminaires for both private homes and commercial projects. Our largest customer base is the project market. For example, our products highlight objects in museums, shop windows, hotel lobbies and art galleries so attention is drawn to the desired location.

You can snap any built in spot from this collection in the same mounting sleeve. Simple, quick, sustainable and great-looking. What more could you ask for?
