CONTEMPORARY

Italy: the country of dolce far niente. After a hard day of labour, you can unwind carefree in our Italian collection. Reading a book on your own, socialising with friends or family. Everything is possible and nothing is forced. Enjoy our contemporary and stringent Italian design and discover how to make your house a home.

Our collections are manufactured using the best materials. We only use natural raw materials: linen & cotton. FSC-wood or solid wood recuperative wood such as old oak are our favourite materials.

MODEL EMMA

TIMELESS COLLECTION

YOUNG

TIMELESS

You are young and sure of your needs. Then, this Timeless collection is what you long for. With a Timeless you are sure to get precisely that settee that is both functional and innovatory.

Our collections are manufactured using the best materials.

We only use natural raw materials: linen & cotton. FSC-wood or solid wood recuperative wood such as old oak are our favourite materials.

At PR-Living we build all our custom pieces by hand using the best possible materials and to heighest standards.

SOFA CONSTRUCTION

FRAME

We make our frames with solid wood that provides for exceptionally sturdy, long-lasting furniture pieces. We use engineered timber to further reinforce the hardwood frame on the sides and back. We join our frames with corner blocks, heavy-duty staples, and industrial-strength glue. All frames have a 5 year limited frame warranty.

SUSPENSION

The seating of the frame is constructed with sinuous steel springs that are securely fastened and provide long-lasting support and comfort. The back of the frame is constructed with synthetic webbing that offers soft and supportive comfort.

CUSHIONS

We produce all of our seat cushions with a high-quality, high-resilience foam core. On some of our designs, the high-resiliency foam is wrapped in fiber and placed in a channeled cotton casing with a blend of feathers, down and fibers. Over time, all foam and filling will soften depending on the usage. Down blend cushions will become softer and will puddle. This is normal and not considered a defect in construction. Since we wrap the sofa in plastic during transportation, you might experience a slight smell. Once the sofa is unwrapped and allowed to “air-out,” the smell will go away after a few days.

CENTER LEG SUPPORT

Don’t be alarmed when you inspect your sofa and notice the center leg support does not touch the ground. As a rule of thumb, the center leg support, located in the middle of the sofa, typically does not touch the ground when no one is on the sofa. It is there for additional support to help even out the weight.

SEATING COMFORT

Our medium-depth sofas keep you vertical, yet relaxed. The dimensions are our most universal, suiting a range of heights and body types.

CARE INSTRUCTIONS

CUSHION CARE

When you receive your new sofa, please be aware that the cushions will need some time to adjust. Cushions are made to fit your sofa, and are packed, shipped, and delivered to you before being sat on. Depending on how often you use your new sofa, it could take a couple of weeks to allow the cushions to break in and soften up fully. We recommend rotating cushions regularly to ensure even wear and thus prolong the life of your sofa. If the cushions are reversible, you should also flip the cushions along with changing their location. Rotation keeps the cover positioned properly on the cushion core. It also evens out the impact of frictional wear and sun exposure on the fabric. Fluffing cushions regularly will help to restore their loft. We recommend to rotate, flip, and fluff loose pillows weekly or biweekly, depending on the amount of use the piece receives.

FABRICS

FABRIC CHARACTERISTICS

Our fabric selection includes a variety of natural and synthetic materials. While we select durable and high-quality materials, slight differences in texture, color, or appearance among fabrics (and leathers) may occur between production runs. This is normal and not considered a defect. We work closely with our supply chain partners to ensure each production run falls within our approved variance range. Over time exposure to extreme temperature changes and direct sunlight may cause color changes. Fabrics are not guaranteed against wear, fading, or shrinking.

GENERAL FABRIC CARE

We recommend routine vacuuming or light brushing. Use the upholstery attachment tool of your vacuum cleaner to remove loose particles. We recommend to vacuum the sofa at least once or twice a month. This will prevent the build-up of dust , which can damage the fabric over time. Avoid prolonged exposure to direct sunlight, since this can cause fading.

HOW TO SPOT-CLEAN STAINS

Blot spills immediately with a clean, absorbent white cloth. Blot from the outside to the middle of the affected area to prevent rings. Spot cleaning can cause a ring or fading. It is best to have the entire piece or cushion casing cleaned by a professional cleaning service to ensure consistent results.

OVERALL FABRIC AND SLIPCOVERS CLEANING

For thorough cleaning, we recommend using a professional in-home upholstery cleaning service. We suggest annual cleaning, but this can vary depending on usage.

PILLING

Pilling is an inherent characteristic of many high-quality upholstered fabrics and is not a fabric fault or defect. The small pilling pieces must first be allowed to form before they can be removed, so it is a characteristic that cannot be pro-actively resolved. Pilling is caused by natural fiber migration from the yarns to the fabric surface as the fabric is rubbed. When pilling occurs, there is often a concern that the fabric is disintegrating and will leave a worn-out area or not retain the proper structure in the fabric. This is not the case. Pilling will stop once the excess fiber is gone. It is recommended to use a fabric pilling comb to shave off the pills. Rarely does pilling re-occur after utilizing this method.

LEATHERS

Leather is a natural material. Slight differences in texture, color, or appearance from hide to hide may occur. Leather is particularly subject to variations in color and markings, such as wrinkles, stretch marks, and healed scars may show. Also, no piece of furniture can be produced from a single hide. These characteristics make leather unique and are not considered defective. Natural color changes, exposure to extreme temperature changes, and direct sunlight may cause color changes and/or surface damage. Over time, leather will naturally develop a patina and a softer, more supple feel, adding comfort and character.

GENERAL LEATHER CARE

Minor scratches such as fingernail scratches or light scuffs may cause a slight mark without truly damaging the leather. Start by using your fingers to gently buff minor scratches or scuffs on the surface.

FURNITURE

WOOD CARE

Dust your tabletop regularly with a soft dry cloth. To remove food debris and dirt, wipe with a damp cloth and then dry. Do not use an abrasive cleaner. Protect your tabletop from liquids, heat, direct sunlight, and abrasives. Do not leave spills unattended, and use surface pad beneath heated dishes. Use a cutting board and coasters to minimize scratches on your tabletop. Note that wood finishes may still darken with time and exposure to the elements. Maintain wax as needed, using a natural beeswax or paste wax free of paint thinners. Hardware may loosen with use. Periodically check to make sure all connections are tight.
